PIG CROP REPORT

JUNE 1963

OCT 10 1963
Release;
June 24 1963
CURRENT SERIAL RECORDS
12:00 Noon (E. D. T.)

The December 1962 - May 1963 pig crop in the 48 States totaled 50,018,000 head, an increase of 1 percent from the 49,692,000 pig crop for the same period a year earlier, according to the Crop Reporting Board. The number of sows farrowing during the period was 7,002,000 head, slightly less than the 7,018,000 farrowed a year earlier. The average number of pigs per litter was 7.14, compared with 7.08 for the December - May period last year.

Based on breeding intentions reports, June-November 1963 farrowings are expected to total 6,207,000 sows, 1 percent more than the 6,164,000 sows farrowed during the corresponding 1962 period. If these intentions materialize and the number of pigs per litter equals the average plus an allowance for trend, the June-November 1963 pig crop will total 44.5 million head, the same as the 1962 crop. At this level, the December 1962-November 1963 crop would be 94.5 million head, slightly more than the crop of a year earlier.

This report is based on a survey of farms and ranches. The data were obtained largely through the assistance of the Post Office Department and rural mail carriers.

3/ Average number of pigs per litter, with allowance for trend used to compute indicated number of fall pigs. Number rounded to nearest 500,000 head.

DECEMBER 1962 - MAY 1963 PIG CROP UP 1 PERCENT

The pig crop in the 48 States during the December 1962-May 1963 period is estimated at 50,018,000 head. This is an increase of 1 percent from the 49,692,000 pig crop during the corresponding period of a year earlier and 3 percent less than the 1957-61 average of 51,392,000 head.

Slight increases in the pig crop in the heavy producing North Central and in the Western regions were partially offset by small decreases in the other regions. The East North Central had an increase of 1 percent and the West North Central 2 percent.

Sows farrowing during the December 1962 - May 1963 period totaled 7,002,000 head, a little below the 7,018,000 sows farrowed during the same period a year earlier. December-May farrowings were 3 percentage points below breeding intentions on December 1, 1962. Regional comparisons of December-May farrowings as a percent of a year earlier and intentions reported in December are as follows: North Atlantic, 98 percent now and 99 percent in December; East North Central, 100 and 104; West North Central, 101 and 103; South Atlantic, 98 and 104; South Central, 93 and 99; and Western, 102 and 94 percent.

The number of pigs per litter during the December-May period averaged 7.14 compared with 7.08 during the same period for both a year earlier and the five-year average. Despite unusually cold weather during the winter months the average number of pigs per litter was the second highest of record--exceeded only by the 7.18 pigs per litter in 1961. Litter sizes were larger than a year earlier in all regions except the North Atlantic and South Central.

Farrowings during the December-February quarter were 36.7 percent of the total farrowings during the December-May period compared with 36.8 percent a year earlier. By months, the percentage of sows farrowing this year compared with last year were as follows: 7.9 percent in December 1962 and 7.0 percent in December 1961; 12.2 in January 1963 and 11.8 in January 1962; February, 16.6 and 18.0; March, 23.3 and 24.9; April, 24.9 and 23.6; and May, 15.1 and 14.7.

JUNE-NOVEMBER 1963 INTENTIONS UP 1 PERCENT

June 1 reports from farmers on breeding intentions indicate 6,207,000 sows will farrow during the June-November period of 1963, up 1 percent from the 6,164,000 sows farrowed during the corresponding period of 1962. Slight decreases from last year are indicated for the South Atlantic and South Central States. By regions, indicated changes from a year earlier are as follows: West North Central, up 3 percent; North Atlantic and Western, both up 1 percent; South Atlantic, down 1 percent; and South Central, down 5 percent. The East North Central was the same as a year earlier.

If intentions for June-November farrowings materialize, and the number of pigs saved per litter equals the average plus an allowance for trend, the pig crop for the period will total 44.5 million head, the same as a year earlier. The combined pig crop for 1963 would be 94.5 million head, slightly more than the 1962 pig crop.

SELECTED CORN BELT STATES

The December 1962 - February 1963 pig crop in the 10 Corn Belt States was 12,803,000 head and the March-May 1963 pig crop was 26,475,000 head. This results in a total pig crop of 39,278,000 head for the December 1962 - May 1963 period, 2 percent more than the 38,509,000 a year earlier, but slightly less than the average of 39,378,000.

The number of sows farrowed in the March-May 1963 period totaled 3,639,000 head, 1 percent more than the 3,597,000 head farrowed during the same months in 1962. Of the sows farrowing during this period 1,281,000 head farrowed in March 1963, which was 7 percent less than the 1,375,000 head in March 1962. The number of sows farrowing in April 1963 was 1,461,000 head, 6 percent more than the 1,373,000 head in April 1962. During May 1963 the number of sows farrowing was 897,000 head compared with 849,000 in May 1962--an increase of 6 percent.

Sows bred and intended for farrowing in June, July, and August totaled 2,451,000 head, 3 percent more than a year earlier and 9 percent above average. Increases from a year earlier were indicated in 7 of the 10 States, ranging from 2 percent in Ohio to 7 percent in Nebraska. Indiana, Minnesota, and Kansas showed no change from the previous year. The farrowings by months are 812,000 sows in June, 701,000 in July, and 938,000 in August. The June 1 intentions for the June-August quarter are 2 percent more than the intentions reported for this period on March 1, 1963.

Reported breeding intentions indicate 2,287,000 sows to farrow during the September-November period in the 10 States, about the same number as a year earlier but 15 percent more than the 1957-61 average. Five of the 10 States indicated increases from a year earlier as follows: 10 percent in South Dakota, 7 percent in Nebraska, 3 percent in Iowa, 2 percent in Minnesota, and 1 percent in Illinois. These increases were offset by expected decreases of 3 percent in both Indiana and Kansas, 5 percent in Ohio, 6 percent in Wisconsin, and 7 percent in Missouri.

ALL HOGS AND PIGS UP SLIGHTLY IN THE 10 STATES

The number of all hogs and pigs on farms June 1, 1963 totaled 49,027,000 head, compared with 48,816,000 head on hand June 1, 1962. The States with larger inventory numbers than a year earlier were South Dakota, up 4 percent; Kansas, up 3 percent; Illinois and Nebraska, both up 2 percent; and Iowa and Missouri, both up 1 percent. Wisconsin numbers were the same as on June 1, 1962, while Indiana showed a 2 percent decrease, Minnesota, a 3 percent decrease, and Ohio a 4 percent decrease.

The number of hogs and pigs used or to be used for breeding in the 10 States totaled 7,606,000 head, 16 percent of all hogs and pigs on farms June 1, 1963.

Other hogs and pigs on June 1, 1963, totaled 41,421,000 head or 84 percent of all hogs. By weight groups, the number and percentage of total in each weight group are as follows: Under 60 pounds, 23,355,000 head or 56.4 percent; 60-119 pounds, 9,087,000 head or 21.9 percent; 120-179 pounds, 5,082,000 head or 12.3 percent; 180-219 pounds, 2,881,000 head or 7.0 percent; and 220 pounds and over, 1,016,000 head or 2.4 percent.
